

## HOW TO: Download Images from the Organic Imagery Archives:

When you find an image that you wish to download, double click it and it will show up on its own page, enlarged.

On the right, there is a link to "Download Low-Res Image"

You can also download images from your Lightbox (see "HOW TO Create an Account" document for help). Click below any image to "Add to Lightbox." You can create a new one or add to an existing.

When you are finished selecting images and adding them to your Lightbox, click the "Lightbox" button

on the top menu bar to view your Lightbox.

From here, you can drag thumbnails to your desktop OR double click the image and click the "Download" button.
